Business Leadership Program with a focus on: Building a coaching culture

Let us harness our expertise to empower your leaders to create greater value through coaching.

In today’s competitive world, a strategic and cohesive approach to business and leadership is more important than ever to remain relevant and competitive. At Haskayne Executive Education, we partner with organizations to customize business leadership learning programs to their specific context to develop their leaders and shape the future of their business.

Our approach to contextualizing programs is to work collaboratively with your organization to understand the specific needs of your business, beginning with a needs analysis which will drive the specific design and delivery of the program.

Program Goals
Programs for organizations address the learning goals of both the organization and individual.

- The goal of this program is to build effective coaching practices within your organization
- Develop your leaders’ core skills to align with coaching competencies and cultivate their confidence to effectively fulfill their leadership roles and responsibilities

In addition, a coaching program for your organization may result in building a common language, improving communication flow, and solving organizational challenges.
At Haskayne Executive Education, our aim is to deliver learning experiences that produce tangible performance outcomes for both the learners and their organizations. In collaboration with your organization, we will design a learning program that supports experiential learning and is grounded in adult learning principles and work-based learning practices.

This is a cohort-based, blended learning program delivered over a period of time. Typical program elements include real-time webinars, workshop-style face-to-face sessions, and think-tank projects to practice new business tools and frameworks within learning teams.

Specific content will be tailored to fit within the context of your organization. Delivery of the program will be scheduled at the time most convenient to your organization’s work cycle.

The below program design provides an example of what your program could look like:
